

MORE DINOSAUR REMAINS

Pictured here are the remains of a huge, long-necked creature that was found on September 18, 2002, in Parkers Cove, Nova Scotia. In a letter to Kent Hovind of Creation Science Evangelism, it was reported by an eye witness, Mr. Steve Hiltz, that “. . . the creature had a neck that was 6’3” long (a basking shark does not have a neck that even remotely resembles this one!) and a smallish head comparable to its body, the eyes (as big as a fist) were only a foot apart, whereas a basking shark’s eyes are much farther apart. An experienced fisherman standing by estimated the weight being between 2-3,000 pounds. Fishermen in the Bay of Fundy from that area have reported seeing a long-necked creature numerous times over the years, but it had been passed off by skeptics and scoffers in various ways.”

ANCIENT BABYLONIAN ARTWORK DEPICTS ‘DRAGONS’

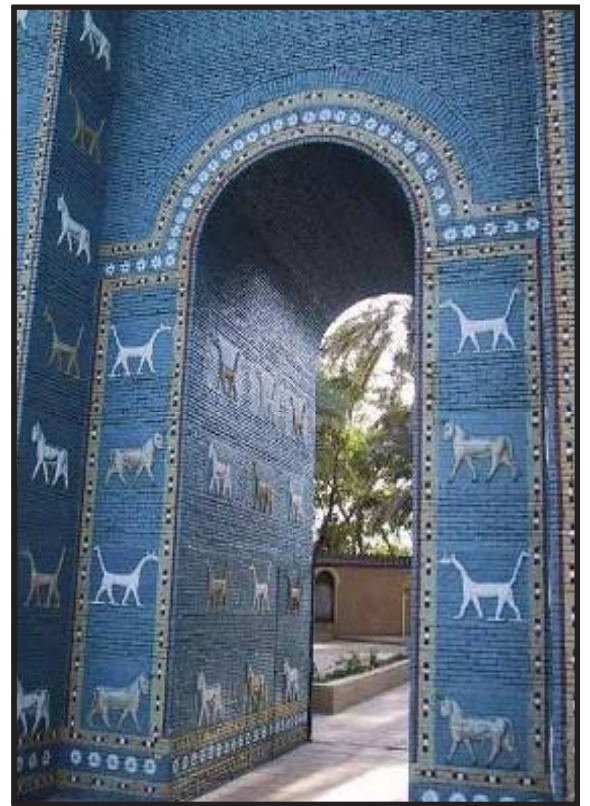

Pictured to the right is the rebuilt Ishtar Gate leading to the new city of Babylon in Iraq. One of the original tiles murals pictured to the left is now in the Vorderasiatisches Museum in Berlin.

People obviously knew something about “dragons” or dinosaurs during the days of the ancient Babylonian Empire. The teaching of evolutionary scientists that all dinosaurs became extinct millions of years ago has many serious problems.

The Bible repeatedly refers to “dragons” in describing huge reptilian creatures. The Scriptures also declare that all life began at creation and that there was no death in either the human or animal kingdoms until sin entered the world through our ancient parents Adam and Eve.

Beautiful Babylonian tile mural that was once part of the famed Ishtar Gate in the city of Babylon.

SO WHAT IF DINOSAURS AND MEN DID LIVE AT THE SAME TIME?

LEADING EVOLUTIONISTS AGREE THAT IF HUMANS AND DINOSAURS CO-EXISTED ON EARTH, THE THEORY OF EVOLUTION WOULD BE “SERIOUSLY FLAWED” AND “UTTERLY DESTROYED”!

Famed evolutionist Dr. Richard Dawkins from Oxford University, admitted that if humans lived on the earth at the same time as dinosaurs -- **“Our whole modern theory of evolution would be utterly destroyed.”** He also commented that proof of coexistence of humans and dinosaurs would “blow the theory of evolution out of the water.”

A Nova TV special entitled “God, Darwin, and the Great Dinosaurs” also made a great confession: **“... dinosaur footprints, side by side with humans. Finding them would counter evidence that humans evolved long after the dinosaurs became extinct and would back up the claim that all species, including man, were created at one time.”** Perhaps we would be wise to take another look at the Genesis account of creation and intelligent design!

The ancient peoples of Peru knew what dinosaurs looked like as we see in this 1,000-year-old “Ica Stone.”

The word “dinosaur” wasn’t used until 1841 when Sir Richard Owen used it to replace the word “dragon” which had been used for centuries in describing the huge reptilian creatures.

The Bible uses the word “dragon” 34 times and is apparently describing what we know as dinosaurs -- *“For God is my King of old, working salvation in the midst of the earth. Thou didst divide the sea by Thy strength; Thou didst break the heads of the dragons (sea monsters) in the waters.” Psalm 74:12*

Even ancient Egyptian artwork depicted long-necked dinosaurs.
