

# WORLD-WIDE FLOOD? WHERE DID ALL THAT WATER COME FROM?

Water and mud tidal waves from the “fountains of the deep” and the “windows of heaven”.

The Bible tells us that in the days of Noah, approximately 4,500 years ago, the “fountains of the great deep were broken up and the windows of heaven were opened.” **Genesis 7:11**

Dr. Walt Brown, Ph.D., a retired NASA scientist, has written an insightful and informative book describing the Hydroplate Theory. It is called “In The Beginning.” [www.creationscience.com/onlinebook/](http://www.creationscience.com/onlinebook/)

Dr. Brown believes that there is evidence that “About half the water now in the oceans was once in interconnected chambers about 10 miles below the

earth’s surface . . . with less water on the earth’s surface, Europe, Asia, Africa, and the Americas were joined across what is now the Atlantic Ocean.”

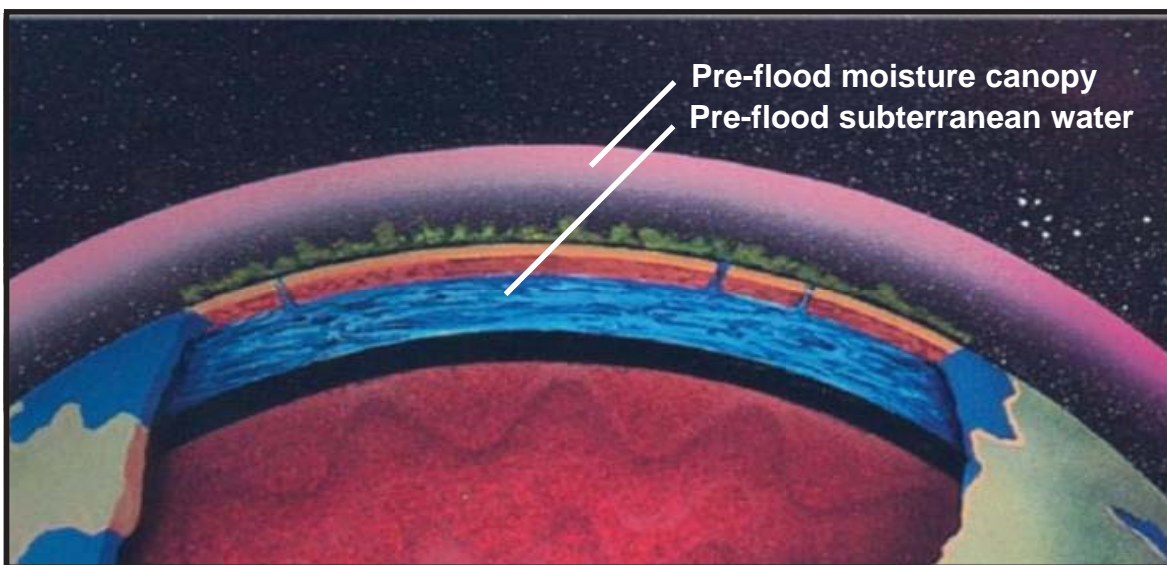

This helps explain how so many fossil fuel oil reserves are found under present day bodies of water like the Gulf of Mexico. The flood in Noah’s day was truly a catastrophic and destructive world-wide event!

When the “fountains of the deep” erupted, gigantic amounts of water spewed miles into the atmosphere causing torrential rains. At the same time, massive mud floods raced around the earth from the ruptured fault lines burying plants and animals and forming the fossil fuel reserves found all over the planet.

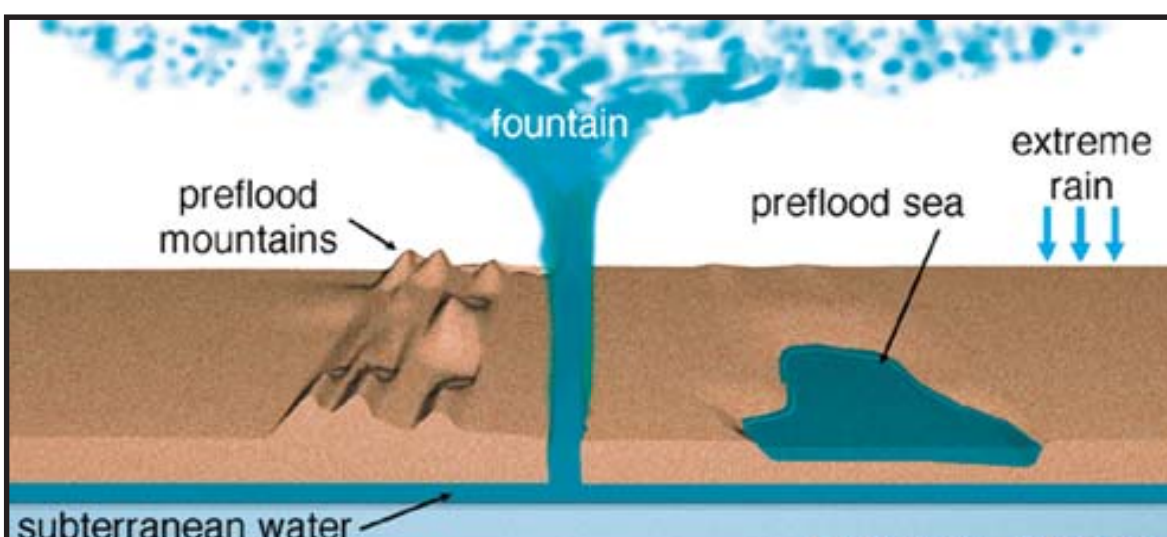

The Bible tells us that before the flood, there was no rain, but the earth was watered by a mist. The Scriptures also record that the rainbow was not visible in the pre-flood world. There was ample moisture in the atmosphere for rainbows, but no direct sunshine.

Animals and humans living in the pre-flood earth were shielded from the destructive rays of the sun and would thus have lived much longer than today. Reptiles would have grown to immense size because of their longer life span plus the availability of food in a tropical paradise that extended world-wide from pole to pole.

In addition to the huge subterranean water chambers, the Bible describes the effects of a massive moisture canopy that shielded the earth from the harmful rays of the sun. Water came forth from the “fountains of the deep” and the “windows of heaven” which were opened.

Before the flood, there were small bodies of water, but the land surface was much greater than now. One can hardly imagine the catastrophic events and the number of animals (and people) destroyed by the flood in Noah’s day.
